## DETAILED ACTION

### *Quayle Action*

1. This application is in condition for allowance except for the following formal matters:

Newly submitted claims 27 – 36 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

- I. Claims 1 – 7 and 9 – 26, drawn to a measuring means and apparatus, classified in class 73, subclass 862.324.
- II. Claims 27 - 36, drawn to a measuring device and a joystick, classified in class 356, subclass 614.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention II has separate utility from Invention I such as an optoelectronic assembly mounted to and distributed between a pair of axially spaced carrier plates that are disposed in a cavity of a hollow portion.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for

examination purposes as indicated is proper.

5. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 27 – 36 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Allowable Subject Matter***

6. Claims 1 – 7 and 9 - 26 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reasons for allowance is that there cannot be ascertained prior art that anticipates or makes obvious the provisions of a force and/or moment sensor comprising a first and a second assembly each comprising a printed circuit board and each carrying part of measuring components, in combination with the other limitations presented in claims 1 and 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
